## EDUCATION

**Universidad Iberoamericana Puebla**  
BA in Interaction Design and Animation  
2021 – 2026 (expected)

**Colegio Humboldt A.C.**  
Junior High and High School  
German bilingual program

## TOOLS

**Mobile**  
Swift / SwiftUI — Intermediate  
**Game Engines & 3D**  
Unreal Engine — Intermediate  
Unity — Intermediate  
Blender — Intermediate  
**Web & Data**  
HTML5 / CSS3 — Intermediate  
JavaScript — Intermediate  
ArcGIS Exp. Builder — Intermediate  
**Adobe Creative Cloud**  
Illustrator — Advanced  
Photoshop — Advanced  
Premiere Pro — Advanced  
Audition — Advanced  
After Effects — Intermediate

## DISCIPLINES

UI/UX Design & Testing  
Mobile Product Design  
Data & Spatial Visualization  
Interactive Systems Design  
3D Modeling & Animation  
Serious Games & Game Design  
Brand Identity & Graphic Design  
Storytelling & Narrative Design

## LANGUAGES

Spanish — Native  
English — B2  
German — B1

## TRAINING

**HackTheBox Academy**  
Cybersecurity Fundamentals path  
Introduction to Information Security  
Introduction to Networking  
Network Foundations  
Linux Fundamentals

## PROFILE

Interaction designer working across UI/UX, data visualization and real-time 3D. I take products from concept to working build, whether that means a native iOS app in Swift, an interactive web interface, or an immersive environment in Unreal Engine. One year of professional experience at Volkswagen Financial Services, where I developed corporate identity assets and enforced global brand standards across multiple automotive brands.

## WORK EXPERIENCE

### Volkswagen Financial Services

*Design Intern · 2024 – 2025*

- Designed and developed a full corporate identity system, including a brand logo successfully registered with the IMPI (Mexican Institute of Industrial Property).
- Coordinated digital assets and information flow for multi-brand marketing campaigns, supporting traffic generation and lead management across multiple automotive brands.
- Executed visual quality assurance on digital advertising and marketing materials, validating full alignment with global corporate identity standards before release.

## SELECTED PROJECTS

### VITALIA — iOS Health & Wellness App · Swift, UI/UX

Designed and built a nutrition and wellbeing app around a deliberate product decision: replacing calorie-counting pressure with habit tracking and emotional journaling. Covers onboarding with a 3-step personalization assessment, macro and hydration dashboards, sleep logging, recipe modules and guided breathing exercises.

### Femicide Cartography — Forensic Architecture Laboratory · JavaScript, ArcGIS, HTML/CSS

Designed and developed a custom web interface for documenting and visualizing data on social crises, translating forensic research into an accessible cartographic narrative.

### The LAF Dashboard — IBERO Puebla · Cartography, Data Analysis

Systematized and qualitatively analyzed participatory mapping data, translating citizen narratives into structured information layers for social urbanism research.

### Echoes of the Past, Voices of the Present — Serious Game · Unreal Engine, 3D Design

Built a first-person puzzle experience on gender inequality in Mexico, mapping each room to a different sphere of life: domestic, media, education and politics. Includes a memorial hall of Mexican pioneers and a final assembled puzzle rewarding legislative milestones.

### RESOURCE — Analog Horror Game · Unity, 2D Art

First-person analog horror game built with 2D assets in a 3D space, currently in final development. Responsible for concept, art direction and in-engine implementation.
